SPECTAR—Where the Profits Begin

390 Java Drive Sunnyvale, CA 94086 Tele (408) 734-9410 Telex 357-499

Careful! A SPECTAR™ is waiting in ambush, ready to hook you to ever-changing excitement and challenge! This space-spectacular will hit you when you least expect it, and never let you go!

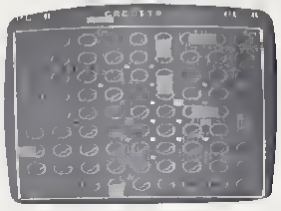
The SPECTAR battleground is colorful and full of surprises. Environment and targets continually change shapes, stimulating player skill. Offered as a full color video upright, SPECTAR features a special coin accumulator permitting the deposit of up to 99 coins. SPECTAR also uses international graphics and its instructions, selectable, in English, Spanish, French and German.

IN THE BEGINNING

In its *Attract Mode*, the monitor displays a pattern of primeval pods on a battlefield, with barricades between random pairs of pods. Rammers evolve from these pods in twos, seeking the player's battleship. Randomly, a pod hatches two special targets. The Spectar of lightning speed, and the Spectar with deadly aim and fire. After several seconds of screen play, the player's battleship explodes into a cloud of smoke; a message appears, encouraging players to deposit coins.

ONWARD! TO THE ALIEN BATTLEGROUNDS!

After the player has inserted the correct coinage (operator-selectable), a brief message prepares the player to brace himself for excitement! Game play begins with the Rammers hatching from pods. You steer your battleship using the 4-way joystick, while firing at Rammers and Spectars for points by pressing the fire button.



NEW FIELDS, NEW ENEMIES, NEW HORIZONS, PLUS EVEN MORE!

Each time you've cleared the alien battlefield of Rammers, a new game field and bonus points are rewarded. Each new battlefield takes you to a totally new alien environment! The battleground changes from the primeval pods, to medieval forests, to geometric cities, to armored crosses . . . there are ten environment changes, requiring ten bonuses to play them all.

As the battlefield changes, the Rammers and Spectars change shape, becoming faster, more devious and wicked. After experience at battle, you will learn the secret to using the barricades to your advantage, and the joystick to your command!
